

*To all our friends and colleagues in Malaysia,*

Our front-line medical, nursing, paramedic and other colleagues in emergency departments, critical care units and public health functions need our help.

In the coming days, what we do matters. Now is the time to relearn dengue & respiratory failure, ECGs & chest radiographs, or infection control & contact tracing. Let us channel our energy into constructive preparations.

As health professionals, we all have a **Duty to Prepare**, because our front-line colleagues and our nation will need us ready. We can succeed against Covid-19, together.

#### **BERKHIDMAT UNTUK NEGARA.**

*The Malaysian Health Coalition is a network of 36 professional societies in medicine and health, representing doctors, specialists, nurses, paramedics, pharmacists and allied health professionals, including Schools of Medicine and senior health professionals.*
